LEADPIVOT Technologies

It is not about proposing solutions; It's about executing them seamlessly.

LEADPIVOT Technologies

Transform & Rationalize to Capitalize: Unleash Your Business Potential

A once and done solution does not exist, when the business needs to migrate applications into the cloud. All apps must be analyzed separately, considering its use, architecture, and strategic purpose in business.

LEADPIVOT 6Rs of a cloud journey

LeadPivot: has a pragmatic approach. We create a digitalagenda designed to speed time-to-value. It spans strategy and experimentation through to transformation leadership and performance delivery.

1. Reimagine: Business processes in the cloud by redefining and enhancing core value propositions.

2. Retire: The applications you don't need anymore.

3. Retain: On-premises applications that are too complex or costly to migrate.

4. Rehost: Applications quickly in the cloud.

5. Replace: Applications for which better and/or cheaper SaaS solutions are available.

6. Refactor: Applications that need significant code rework for the cloud, decoupling from other systems as needed.

What We Do

•**Project management:** From idea to solution, our project management approach allows business to concentrate on what they do best, while our team applies their knowledge, skills, tools and techniques to project activities to meet the project requirements. More often than not we combine our software design powers to enhance any project.

Since a project is a temporary endeavor, it has a clear beginning and a clear end. Be sure that your technology projects are managed with your business goals in mind.

Software Development & Design

•**INMUNITAPASS Risk Management Software:** Is a unified risk management software platform that allows you to manage the risks of vaccinated and non vaccinated employees, offering a best-in-class visualization model that allows for fast and accurate containment. The software also maintains the vaccination records of your employees and dependents quickly and effectively.

•**CampusHealth D.V.C. Risk Management Software:** Our CampusHealth Risk Management Software is the tool to manage a safe reopening, secures all the vaccine data and offers a visualization of all vaccinated and non vaccinated, and issues a Digital Vaccination Card for those that have their vaccinations.

The LEADPIVOT implementation plan combines business and technology expertise and accelerates the crossing from initiative to results.

🛈 **eCommerce** - business model that lets business and individuals buy and sell goods or services over the internet. With the help of multi-layered security, monitored transactions, SSL certification and hosting solutions, online transactions are made in a safe and secure environment.

🛈 **Project Management** "Is the application of knowledge, skills, tools and techniques to project activities to meet the project requirements. Be sure that your technology projects are managed with your business goals in mind."

🛈 **Data Science** - inspire innovation and generate new revenue and profit with tools like CRM, Cross-Selling and Business Analytics.

🛈 **Customer Experience and Marketing** - redefine customer experience to boost loyalty, reduce cost-to-serve and streamline growth.

🛈 **Digital Organization** - empower your organization and workforce to lead in a virtualized world.

🛈 **Digital Technology Strategy** - ensure that technology strategy supports your digital strategy – becoming the foundation for success.
